DETAILED ACTION

Status

1. This action is in response to the after final filed January 13, 2009. Claims 38-40, 46, 51-52, and 67-77, are currently pending. Claims 1-37, 41-45, 47-50, 53-66 have been cancelled. Claims 1-2, 8-9 are currently amended.

Allowable Subject Matter

2. Claims 38-40, 46, 51-52, and 67-77 are allowed.

3. The following is an examiner's statement of reasons for allowance: The closest prior art to the claimed invention are Coutts (US 6,311,165), Dave (1992 IEEE) and Huang (US 6,907,565), Maes et al (US 6,016,476 A), Hsu et al (US 6,587,684 B1).

4. Coutts discloses a transaction processing systems, such as banking or retail transaction systems, and in particular, to associated transaction processing terminals and networks. Coutts also discloses modules adapted to function as constituents of a transaction terminal operating through a server in a transaction network. Dave discloses the various uses of proxies, as well as application interfaces, and distributed systems. Huang discloses creating, viewing and editing electronic documents using a Web browser. Maes discloses a portable information and transaction processing system and method which utilizes digital certificate security and biometric authorization to provide

Art Unit: 3694

personal verification prior to processing user requested financial transactions and providing personal information. Further Mae teaches a cell phone which is in communication with an ATM and downloads a digital certificate. Hsu teaches downloading software to portable wireless digital telephones. The combination of Coutts, Dave, Huang, Maes, and Hsu teach the basics of the invention including a cell phone which can download information and communicate with an ATM. The combination provides for the downloading of a digital certificate and a software application but does not specifically teach the down loading a ATM service proxy software component which contains a menu indicia, which is used to cause a cell phone to be operative to cause an ATM to perform at least a transaction function. The combination does not provide an interface menu on the cellular phone wherein a selection in the menu allows for the user to operate an ATM. Thus Coutts, Dave, Huang, Maes, and Hsu or a combination thereof do not specifically teach all the limitations of independent claims 46, 67, and 77.

5. The dependent claims 38-40, 51-52, and 68-76 being further limiting to the independent claims, definite and fully enabled by the specification are also allowable.

6. It appears that the instant invention is beyond the skill of one of ordinary skill in the art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it, NOR would they have been

Art Unit: 3694

able to predict the results, and as such, they would have had no capability of expecting success.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
